## General changes

- Explanation and terminology have been added to explain columns in person and household files.
- Table of contents and contact details for Christine Khoza and Angela Ngyende have been added.
- Rounding of numbers may have resulted in a single digit difference in some figures.
- Person indicators:
  - Youth (aged 15-34 years) figures and proportions have been amended for all nine provinces for CS 2016 due to outstanding data edits that were applied after the release.
  - Persons aged 20 years+ who have completed Grade 12 have been amended for all nine provinces for CS 2016 due to outstanding data edits that were applied after the release.
- Household indicators:
  - Piped water for 2011 was removed as the question was not phrased in the same way as in CS 2016; therefore the results are not completely comparable.
  - Groupings for piped water were revised for 2016 (Piped water and Other sources).
  - Groupings for toilet facilities were revised (Flush/chemical toilet, Other and None) for Census 2011 and CS 2016.
  - Groupings for electricity were revised for CS 2016 to include: Connected to electricity, Other sources, and No access to electricity.

Poverty headcount	The poverty measures used in the table are based on the South African Multidimensional Poverty Index (SAMPI). The SAMPI is an index that is constructed using eleven indicators across four dimensions, namely health, education, living standards and economic activity. There are two measures mentioned in the table, namely the "poverty headcount" and the "intensity of poverty". The poverty headcount shows the proportion of households that are considered to be "multidimensional poor" in the defined area
Intensity of poverty	The intensity of poverty is the average proportion of indicators in which multidimensional poor households are deprived
Total households	Total number of households in a geographic area as per municipal borders (2011 Demarcation)
Household size	The average number of persons in the household
